

Sea Caves & Ecological Reserve Kayak Tour

La Jolla Sea Caves and Ecological Reserve Kayak Tour

This is our most popular kayak tour, and for good reason! With no experience needed, you can kayak the La Jolla sea caves and ecological reserve, which boasts an amazing array of scenery and wildlife you can't find anywhere else in San Diego. As you paddle alongside your expert naturalist/biologist guide, chances are good you will see one or more of the following: Sea Lions, Dolphins, Harmless leopard sharks, Harbor Seals, Bat Rays, and an abundance of brilliant fish and magnificent sea birds

This is one of the premier eco-tourism experiences in San Diego. We'll launch from La Jolla Shores, kayak through the incredible rock formations and caves (if conditions permit), through the expansive kelp forests and wildlife hot spots, and cap it all off with a kayak surf ride back to the beach. Every season brings a new set of wildlife to get to know, and San Diego's consistently mild climate makes kayaking a great activity any time of year!

Our friendly and accommodating guides are expert naturalists with backgrounds in marine biology, ecology, environmental science, photography, and outdoor recreation. Additionally, our guides hold advanced certifications in kayak instruction, outdoor leadership, wildlife education, and CPR/First Aid.
